***Response to Amendment***

This Office Action is in response to a communication made on August 22, 2005.

The Information Disclosure Statement was received on August 31, 2005 and has been considered.

Claims 48-61, 69-70, 78-82, 84-88, 90-93, and 95-100 have been cancelled.

Claim 63 has been amended.

Claims 63-65, 67, 68, and 71-76 are pending in this application.

Claims 63-65, 67, 68, and 71-76 are allowable over the prior art on record.

***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance:

The primary reason for allowance is that the examiner has found that the prior art of record does not teach or suggest or render a system with the means for configuring a system for power management over a network, which includes developing at least one software application for the system. More specifically, the prior art does not disclose or teach a software development system that received user information over a network and develops a software application and integrates a customized screen design. Where the customization of the screen design includes adding devices to the a configuration application, adding trend points to a historical database, creating a one line diagram screen, creating trend and tabular screens for each device, and testing the screen design with a dynamic data exchange simulator to ensure functionality. These differences are present in the specification and are located in the independent claim 63.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
